

# Obituary

**BAKER,  
Margaret  
December 10, 1954 -  
Jan. 16, 2024**

Love is the only thing.

Our lovely Margaret has passed away. She died peacefully at home surrounded by family and so

much love. An aggressive cancer took her from us all.

A gathering was held on January 20 for the family to say farewell.

Lorne, Stephanie, and Spencer greatly miss their partner and mom.

Growing up in Watrous instilled a strong sense of community in Margaret. With parents, Jeff and Jean, and brother Glen (Judy) the household was always welcoming and filled with wonderful memories.

As a pharmacist, Margaret had an impactful early career working at Royal University Hospital in Saskatoon before completing her Master of Science researching a treatment for cystic fibrosis. Her passion for accessible health care led to her work in the Ministry of Health where Margaret provided a significant contribution to the Drug Plan and Primary Health Care and was chosen to represent Saskatchewan in a federal government leadership program.

Moving into retirement, Margaret truly enjoyed long morning walks, no matter the weather (if you can believe it). Heated vest: best present ever!

Margaret also developed a passion for golf a few years ago and would often be found on course, rain or shine. When he could spirit her away from her golf gals, Lorne and Margaret just loved golfing together.

Throughout her life, her fundamental joy was her family. Vacations, outings and back yard fun meant the Baker-Boyles were always off on a newww adventure. Never without a smile, Margaret had an enthusiasm for life that inspired us all.

Reflecting on the kind words we have received, it is clear that Margaret will be dearly missed by family, friends and colleagues. Because she was so loved, a larger celebration of Margaret's life will be held in April. Margaret will absolutely hate being the centre of attention but we'll ignore that because we all want to say goodbye to our dear, sweet gal.

Because Margaret was so connected to her late father, whose own contribution as a carpenter, a builder, and a community contributor was so strong, we kindly request that you provide for others rather than sending flowers or food. Habitat for Humanity was an organization that Margaret would have wished to contribute more to, please consider them with a donation.

The tears we shed represent the love we have  
For the one we have lost,  
Let them flow freely and often.
